# ELD Mandate Device Checklist

## Checklist

- Enable single app or multi app kiosk for approved driver or fleet apps.

- Prevent unauthorized apps and block distracting OS features.

- Control OS and app updates during a maintenance window.

- Apply network rules and certificate-based access.

- Track device location where permitted by policy.

## How Codeproof helps

- Kiosk and POS modes with app allow lists.

- Silent updates where supported and version control.

- Wi-Fi, VPN and certificate deployment at scale.

- Location reporting and device status monitoring.
