HIPAA Endpoint Compliance Checklist

Checklist

- Encrypt devices at rest and enforce strong passcodes.

- Limit app access to approved apps that handle ePHI.

- Use containerization for BYOD to separate work and personal data.

- Enable automatic lock and idle timeout in line with policy.

- Apply selective wipe for lost devices and offboarding events.

- Maintain device inventory, audit logs and access records.

How Codeproof helps

- Policy enforcement for encryption and passcodes across platforms.

- Managed app catalogs and allow or deny lists for ePHI apps.

- Selective wipe, full wipe and remote lock capabilities.

- Email, Wi-Fi and VPN profiles scoped to work data only.

- Audit and activity logs with exportable device reports.
